

# Sclerotherapy Training Program

**Program Title:** Sclerotherapy Training Certificate

**Program credential:** Certificate

**Program Duration:** 1 day

**Class Schedule:** From 9:00 am to 5:00

**Eligibility:** Doctors (MDs) and Nurses (RN, RPN, NP) and IMGs (International Medical Graduated

## Program Overview

Our Sclerotherapy Training course offers a comprehensive education of this beneficial treatment to physicians and nurses. Through this course, you will discover the entire sclerotherapy procedure, which includes viable injection techniques, standard of care, and proper patient evaluations. Sclerotherapy has been proven to be advantageous to medical practices, not just financially for the practice, itself, but by delivering an exemplary success rate among patients. Our Sclerotherapy Training will provide you with the necessary resources to make the integration process possible.

After completing the program you will then be able to thoroughly evaluate the potential patient with aesthetic and/or medical requests in addition to:

- Become proficient in the latest sclerotherapy techniques both by injection and the various laser light solutions available.
- Gain a full understanding and receive the technical skills needed to perform the various sclerotherapy procedures taught through our training.
- Learn to identify the medical patient suffering from venous incompetence including reflux, muscle wasting, and other forms of medical venous disorders.
- Understand when to perform specific diagnostic studies and the importance of ultrasound and other non-invasive studies as it relates to patients indicated with venous insufficiency.
- Learn the importance of post-treatment compression for the destruction of reticular veins and in limiting post-procedure complications.
- Learn to implement specific strategies for marketing and practice growth.
